

## Internship for students (m/f)

### Company:

morewind offers services for international wind turbine developers and operators along the whole lifecycle. Our highly experienced team covers a large work field ranging from design studies, load simulations, structure-mechanical designs and analysis to system validation and optimisation as well as consulting.

### Job description:

A variety of different technical fields meet each other within the development, realisation and optimisation process of wind turbines. Therefore, morewind offers different options of specialized internships within a personal and open environment.

### Job requirements:

- Student (m/f) enrolled at an accredited university pursuing a Bachelor's or Master's degree within a technical/engineering field, for example Mechanical Engineering
- Internship has to be mandatory and integral part of the course of studies
- First programming experience required
- Ability to manage projects and time effectively
- Ability to work independently or as a member of a team
